Dear Mr. Breitenbach:

I urge CALFED to adopt a plan that maximizes water efficiency and conservation, and bases future water needs on realistic assumptions rather than inflated demands.

Also, I urge CALFED to remove barrier dams to increase instream flows and to acquire and restore habitat for fish and wildlife. I encourage a plan that does not rely on proposed dam raises or new offstream storage reservoirs. Finally, I'd like to see a plan that improves water quality by enforcing pollution limits.

Thank you for your consideration.

Sincerely,
